JDRF

ROADTOUR

DESTINATION:

## A Cure for T1D

The past 18 months have been an exciting time in type 1 diabetes (T1D) research. To share these updates to the Southeast Michigan and Toledo, OH communities, JDRF is taking its team of Research Information Volunteers (RIV's) out on the road! Join us at one of our Research Road Tour stops to hear the latest in our quest to cure, treat and prevent T1D. Our RIV's will provide updates about artificial pancreas technology, beta cell encapsulation, and smart insulin, among others.

This event is free and open to anyone impacted by T1D. Light refreshments will be provided.

Registration is required & space is limited.

To register for a tour date, please visit:
