

# TURNING TYPE ONE INTO TYPE NONE

## How We're Working Toward a Day Without Type 1 Diabetes

Can you imagine a world without type 1 diabetes? We can. That's why we work tirelessly everyday to fund research projects that aim to bring real results to people living with T1D. Whether it's progress toward a new therapy that will make living with T1D easier or a cure, we won't stop until we've turned type one into type none.

### DO YOU KNOW THE NUMBERS?

Americans with type 1 diabetes

**2017**  **1.25 MILLION**

**2050**  **5 MILLION**

If we don't continue to support research, 316% more people will have T1D by 2050.

In 2016 and 2017, we awarded more than 177 new research grants and funded 500 active grants, 107 training grants and 57 active clinical trials.

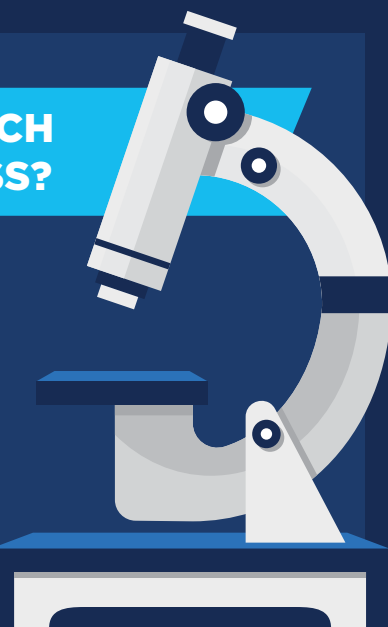

Every year, we fight for the renewal of the Special Diabetes Program, which has directed **\$2.5 billion** to T1D research.

### HOW ABOUT THE RESEARCH THAT'S DRIVING PROGRESS?

We've committed

**\$2 BILLION** to T1D since 1970.

In fact, we're committing more over the next four years.

#### RYAN

Research advances, like **artificial pancreas systems**, move us towards a day where kids like Ryan won't have to wake up during the night to drink juice.

#### NORMA

The research behind **beta cell replacement** will help patients like Norma enjoy life without having to take insulin for months, or possibly years, at a time.

#### JANA

As a glucose control trial participant, Jana started seeing a straight line in her **blood-glucose levels**, successfully avoiding the highs and the lows.

#### ANTHONY

Thanks to our dedicated **advocacy team**, Anthony, who has had T1D for 14 years, now has a continuous glucose monitoring device within his Medicare coverage.

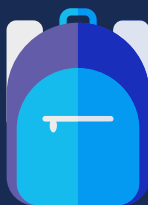

### HAVE YOU JOINED THE JDRF COMMUNITY YET?

We're always here to help. In 2016 and 2017, we...

Collectively brought **900,000 people** to **210 One Walks** to raise awareness.

Delivered **15,000 Bags of Hope** and **3,000 Care Kits** to people newly diagnosed with T1D.

Provided information to **10,000 people** with T1D and their loved ones at **50 TypeOneNation Summits**.

JDRF is the leading global force in funding type 1 diabetes research. No other organization is doing more to create a world without T1D.
